

Marketing Campaign Performance Analysis

Business Case Study

Tools Used

- SQL
 - Power BI
 - Excel
-

Business Scenario

Background

Organizations invest heavily in digital marketing campaigns across different industries and regions. However, marketing managers often struggle to determine:

- Which campaigns generate the highest revenue
- Which campaign types deliver the best ROI
- Which regions perform most effectively
- How marketing spend impacts revenue generation
- Which campaigns require optimization

This analysis was conducted to evaluate campaign effectiveness and support data-driven marketing decisions.

Business Objectives

Objectives

Increase Revenue

- Identify high-performing campaigns
- Maximize returns from marketing investments

Optimize Marketing Budget

- Detect low-performing campaigns
- Reallocate spending toward profitable campaigns

Improve Campaign Effectiveness

- Analyze clicks and conversions
- Evaluate campaign engagement

Regional Performance Analysis

- Compare campaign performance across regions
- Identify high-growth markets

Strategic Decision Making

- Support future campaign planning using data insights
-

Dataset Overview

Dataset Information

The project uses three datasets:

Marketing Campaign Performance

Contains campaign-level metrics:

- Campaign ID
- Campaign Name
- Region
- Industry
- Spend
- Impressions
- Clicks
- Conversions
- Revenue
- ROI

Marketing Campaign Details

Contains campaign category information:

- Campaign Name
- Campaign Type
- Average Spend
- Average ROI
- Total Campaigns

Region Performance

Contains regional KPIs:

- Region
- Total Spend
- Total Revenue
- Average ROI

Data Relationships

- Campaign Name → connects Campaign Details and Campaign Performance
 - Region → connects Campaign Performance and Region Performance
-

Key Performance Indicators (KPIs)

Marketing KPIs

Revenue KPIs

- Total Revenue
- Revenue by Campaign
- Revenue by Region

Spend KPIs

- Total Marketing Spend
- Average Campaign Spend

Performance KPIs

- Return on Investment (ROI)
- Average ROI by Campaign Type

Engagement KPIs

- Total Impressions
- Total Clicks
- Click Through Rate (CTR)

Conversion KPIs

- Total Conversions
 - Conversion Rate
-

Data Cleaning Process

Data Preparation Performed

- ✓ Checked for missing values
- ✓ Verified campaign names for consistency
- ✓ Standardized campaign categories
- ✓ Validated revenue and spend values
- ✓ Removed duplicate records
- ✓ Checked data relationships between tables
- ✓ Verified data types

Result

Improved data quality and ensured accurate reporting and dashboard calculations.

Product Performance Analysis

Campaign Performance Analysis

Top Revenue Generating Campaigns

Analysis:

- Ranked campaigns based on revenue generated
- Identified highest-performing campaigns

Business Insight: A small group of campaigns contributes a significant share of total revenue.

ROI Analysis

Analysis:

- Compared ROI across campaigns
- Measured profitability of marketing investments

Business Insight: Some campaigns generate higher returns despite lower spending.

Campaign Type Analysis

Analysis:

- Compared performance across campaign types
- Evaluated average ROI and revenue

Business Insight: Certain campaign categories consistently outperform others.

Regional Analysis

Analysis:

- Compared revenue and ROI across regions
- Evaluated market performance

Business Insight: Some regions provide stronger returns and growth opportunities.

Conversion Analysis

Analysis:

- Compared clicks and conversions
- Calculated campaign conversion effectiveness

Business Insight: Campaigns with strong engagement typically achieve better business outcomes.

Key Insights

Major Findings

- High-performing campaigns generate the majority of revenue.
 - ROI varies significantly across campaign types.
 - Some regions consistently outperform others in revenue generation.
 - Several campaigns have high spending but relatively low ROI.
 - Strong conversion rates contribute directly to higher campaign profitability.
 - Marketing spend alone does not guarantee better performance.
-

Recommendations

Immediate Actions

1. Increase Investment in High-ROI Campaigns

Allocate additional budget to campaigns delivering the highest returns.

2. Optimize Low-Performing Campaigns

Review campaigns with high spend and low ROI.

3. Focus on High-Performing Regions

Replicate successful marketing strategies in top-performing regions.

4. Improve Conversion Rates

Optimize campaign messaging and targeting to increase conversions.

5. Monitor Campaign Type Performance

Prioritize campaign categories that consistently generate strong ROI.

Business Impact

Expected Benefits

Revenue Growth

- Higher returns from marketing investments
- Increased campaign profitability

Budget Optimization

- Reduced spending on underperforming campaigns
- Improved resource allocation

Better Decision Making

- Data-driven campaign planning
- Improved forecasting and strategy development

Increased Marketing Efficiency

- Better audience targeting
- Higher conversion performance

Sustainable Growth

- Stronger regional expansion opportunities
- Long-term improvement in campaign effectiveness

Project Outcome

Developed an end-to-end Marketing Campaign Performance Dashboard using SQL and Power BI to analyze campaign effectiveness, ROI, regional performance, and revenue generation. The dashboard enables stakeholders to make informed marketing decisions and optimize future campaign investments.
